B-Tech Computer Science and Engineering (AI/ML) student with an intermediate foundation in Python and practical experience in React.js web development through an internship. Currently building foundational knowledge in machine learning and AI concepts, with an interest in developing data-driven and AI-enabled applications. Familiar with Java, Python, JavaScript, HTML, CSS, and SQL.

Education

CMR Engineering College

September 2024 – May 2028

Bachelor of Technology (B-Tech) — Computer Science and Engineering (AI/ML)

CGPA: 8.47 / 10

Shivani Junior College

June 2022 – March 2024

Intermediate – MPC

Percentage: 97%

Technical Skills

Programming Languages : Oops Java, Python and Libraries, C.

Web Development : HTML, CSS, JavaScript, React.js.

Databases : SQL, MySQL.

Developer Tools : Git, GitHub, VS Code.

Internships / Experience

React.js Web Development Intern

Jun 2026 – Jul 2026

Codtech IT Solutions Private Limited | Remote

Projects

Smart Agriculture System | HTML, CSS, JavaScript, LocalStorage | GitHub

- Developed a responsive web application for entering soil and environmental data and generating rule-based crop recommendations.
- Implemented form validation, JavaScript-based recommendation logic.

Certifications
